EXPERIENCE

Github link: <https://github.com/Eyohen?tab=repositories>

EaronDemand, Winnipeg, Canada — Software Engineer

<https://earondemand.com/>

Here at Earondemand i am currently working on Pigeonhire, which is a global platform for connecting group community leaders for several purposes such as selling, advertisement, promotion etc

<https://ourgwala.com/>

We built and launched gwala application which is a financial contribution application with administrative privileges and allocation for different users to contribute towards events or celebrations etc

AppCentralGroup, Workstation, VI — Software Engineer

November 2023 - February 2024

Link: <https://www.accuvend.ng/>

Here at AppCentralGroup we worked on a contract for Accuvend. I worked on the core vending engine in collaboration with Kafka for vending, Electricity, Airtime, Internet Data etc. This server API is documented and given to banks to connect to

their banking applications to vend from. It is called AccuPrivate on my github

Royalti music accounting company, Remote, Backend engineer

April 2022 - May 2023

Link: <https://www.royalti.io/>

Here at Royalti I was responsible for building the entire Backend system software including management, accounting, splits, analytics and cloud infrastructure management built with node typescript, sequelize.

SKILLS

Git, node, express, typescript, javascript, Apache Kafka, react, Nextjs, tailwindcss, postgresql, mongodb, sequelize, redis, postman, python, mysql, firebase, laravel

Nestoil/Neconde oil and gas company, Akin Adesola road VI, *Cloud Architect*

October 2019 - March 2020

Here at Neconde we wrote cloud infrastructure with Google cloud written with python to help retrieve PPA, welfare, survival kit information for Upstream workers.
